

C-Pills Auto

Capsule and film-coated tablet counting machine

Automatic capsule and film-coated tablet counting machine

The C-Pills is a automatic counter equipped with :

- Touch screen for configuration (number of capsules per jar, number of jars to be produced, activation/deactivation of functions, vibration intensity to manage speed, etc.).
- Vibrating hopper with frequency adjustable by potentiometer, electrically adjustable height, capacity of 60,000 capsules (size 0).
- Rotating glass counting table, electrically adjustable in height.
- Counting chamber with laser curtain.
- Jar detection cell.
- Stainless steel conveyor with double set of pneumatic cylinders.
- Upper polycarbonate cover to protect the table.
- Hopper, strapping and table can be dismantled without tools for excellent cleanability.
- Connection available at the hopper outlet for dust extraction.
- Parts in contact with the product: mirror-polished stainless steel or food-grade POM C.
- The machine complies with CE standards.

Available options

- Interchangeable strapping system (easy handling between two productions),
- Automatic height memorisation and recall via the touch screen,
- Training in the use of the machine (for a single format).

C-Pills Auto technical specifications
